Field & Lab Analysis: **QUANTOFIX TEST STRIPS**

Quantofix test strips are semi quantitative. They meet the most important requirements for a modern quick test.

Rapidity: Most of the QUANTOFIX® test strips can be carried out in 10 120 seconds. That makes the application very quick for the end user.

Convenience: All QUANTOFIX® tests are ready to use kits. They are pre calibrated and contain all necessary equipment and reagents. As "labs in a pocket" they are very handy for the end user.

Precision: The colour charts are adjusted and checked using certified standard solutions that are directly traceable to primary NIST standards. The user can be sure to receive accurate readings whenever he tests.
