

Innovation in Environmental & Process Technology

*We **Understand** Water & Waste Water Monitoring*

Oil on Water Measurement

Typical abstraction or drainage channel application

Features:

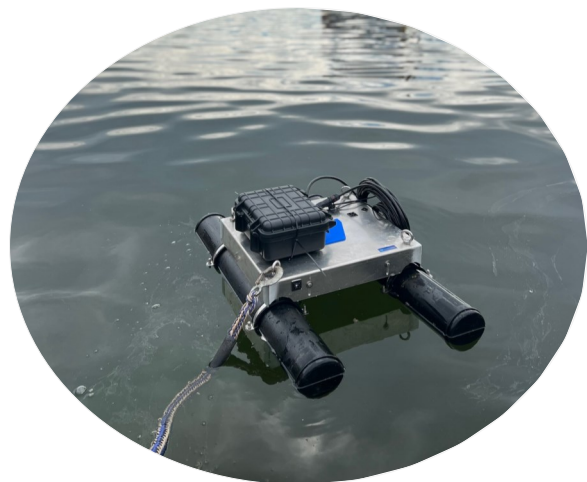

- Floating In situ operation
- No chemicals required
- Analogue output
- 2 relay outputs
- Data logging (2GB memory card)
- Real time local digital display

Benefits:

- Low cost of ownership
- No frequent calibrations needed
- Minimal maintenance
- Pollution early warning
- Automated shutdown or diversion

Applications:

- Abstract protection
- Surface water runoff monitoring
- Inland waterways
- Industrial effluents
